

The Wisconsin no-call list is a great protection for the consumers and private citizens of the state. I can't believe that there is any consideration being given to eliminating this list. As a citizen this list gives me the right and opportunity to say "No, I don't want strangers calling me and bugging about products and services that I have no interest in." My time is valuable and I don't want these telemarketers calls. Please do not weaken or eliminate the Wisconsin no-call list.
